### Description

EVOLVE Vision XD is equipped with a speed processor, a big operating memory and a new operating Android system.

You can now enjoy the games, films and other applications on the big 10.1" display with the IPS technology. IPS display offers the clear picture, exact colours and wide observational angles.

### Storing and portability

EVOLVE Vision XD is a super thin tablet with 10.1" IPS display and back panel made of the aluminium. The inner 8 GB memory is easy to extend using the micro SDHC card.

### Optimized for fun

See your photos, watch the films, download the applications from the Google Play or use Skype for a video chat with your friends and family.

EVOLVE Vision XD contains a lots of interesting games (EVOLVE Gamepack) and also useful applications (EVOLVE PlusPack) – you can start using it fully immediately after switching on. If you connect it to your television using the HDMI cable, it enables you play your favourite Android games on the big television screen, browse the internet pages or see your photographs.
